## MOBILE AND BATTERY-DRIVEN WORKSTATION

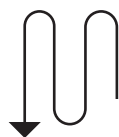

### AIR.GO ASSISTANT

The Air.Go Assistant is a battery-powered, motorized, and height-adjustable mobile counter for airports. It improves workflow and enhances service by allowing staff to assist passengers where it is needed, offering flexibility and efficiency.

Fully functioning as a manual check-in counter, the unit can be equipped with a monitor, CPU, scanner, and more. Its compact design includes integrated storage for essential hardware, and its ergonomic, height-adjustable setup ensures a comfortable working environment for staff.

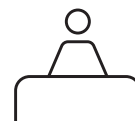

The mobile counter has motor-assisted mobility and cable-free operation, making it easy to move and use throughout the airport. Designed to enhance flexibility, efficiency, and staff comfort, it provides an all-in-one solution for modern airport operations.

The Air.Go Assistant is manufactured in Denmark.

#### BETTER FLOW

Airport staff can meet and assist passengers in their natural flow, avoiding the need to send them from queue to queue.

#### COMPLETE WORKPLACE

Air.Go Assistant offers a full workspace with all the functionalities of a traditional check-in counter.

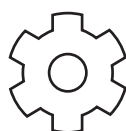

#### 100 % MOBILE

The unit is battery-driven, motorized, Wi-Fi enabled, and can be used anywhere in the airport without plugging in any cables.

#### ERGONOMIC

The unit is height-adjustable, and has strategically placed hardware to ensure optimal working postures.

#### CUTE/CUPPS COMPATIBLE

The unit can be equipped with a fully CUTE/CUPPS-compatible work environment, supporting equipment from major suppliers.

#### INTUITIVE

The user-friendly design allows staff to easily operate the unit's functions, while maintaining a minimalist and clean design.

### USE CASES

#### VISA CHECK (IMMIGRATION)

Strict document control and regulatory requirements increase waiting time. The Air.Go Assistant offers an efficient workspace and authority for airport staff.

#### GATE CHECK-IN

Gate services are often necessary depending on passenger type. The mobile Air.Go Assistant can quickly and efficiently be put into operation.

#### SERVICE & PRM

Air.Go Assistant is ideal for passengers requiring special attention and can be customized for specific needs.

#### REMOTE CHECK-IN

It's beneficial to direct passengers with special needs away from the main flow to enhance overall efficiency.

#### CRUISE SHIP BAG DROP & CHECK-IN

During the cruise, guests can check in their luggage to avoid airport queues, resulting in better flow to the airport.

#### SELF SERVICE CHECK-IN

Assists self-service bag drops by checking in passengers for a smoother travel experience.
