

AIR.GO ASSISTANT

MOBILE AND BATTERY-DRIVEN WORKSTATION

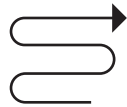

AIR.GO ASSISTANT

The Air.Go Assistant is a battery-powered, motorized, and height-adjustable mobile counter for airports. It improves workflow and enhances service by allowing staff to assist passengers where it is needed, offering flexibility and efficiency.

Fully functioning as a manual check-in counter, the unit can be equipped with a monitor, CPU, scanner, and more. Its compact design includes integrated storage for essential hardware, and its ergonomic, height-adjustable setup ensures a comfortable working environment for staff.

The mobile counter has motor-assisted mobility and cable-free operation, making it easy to move and use throughout the airport. Designed to enhance flexibility, efficiency, and staff comfort, it provides an all-in-one solution for modern airport operations.

The Air.Go Assistant is manufactured in Denmark.

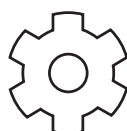

BETTER FLOW

Airport staff can meet and assist passengers in their natural flow, avoiding the need to send them from queue to queue.

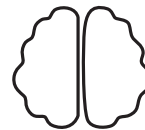

100 % MOBILE

The unit is battery-driven, motorized, Wi-Fi enabled, and can be used anywhere in the airport without plugging in any cables.

CUTE/CUPPS COMPATIBLE

The unit can be equipped with a fully CUTE/CUPPS-compatible work environment, supporting equipment from major suppliers.

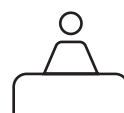

INTUITIVE

The user-friendly design allows staff to easily operate the unit's functions, while maintaining a minimalistic and clean design.

ERGONOMIC

The unit is height-adjustable, and has strategically placed hardware to ensure optimal working postures.

COMPLETE WORKPLACE

Air.Go Assistant offers a full workspace with all the functionalities of a traditional check-in counter.

FEATURES

- Fully Functional Workspace
- Storage for workspace hardware in desktop drawer
- Electronic lock for central locking of all drawers
